

Preliminary Call for Workshop Proposals

SEFM 2019

17th International Conference on
Software Engineering and Formal Methods
Oslo, Norway, September 16–20, 2019

<http://sefm2019.inria.fr>

Objectives and Scope

The aim of the International conference on Software Engineering and Formal Methods is to bring together practitioners and researchers from academia, industry and government to advance the state of the art in formal methods, to scale up their application in the software industry and to encourage their integration with practical engineering methods. Satellite workshops provide further opportunities for collaborating and exchanging ideas about specific topics of Formal Methods and Software Engineering, from conceptual to practical aspects. Presentations and discussions may be based on preliminary results, recent progress, practical experiences and research proposals, and focus on domain-specific contexts, needs and/or applications, multidisciplinary aspects and communities, coordination between representatives of a technical community and proposed, ongoing or recently completed projects.

SEFM 2019 invites prospective workshop organisers to submit their ideas for workshops by **11. January 2019** at the latest. Workshops should be targeted to research work in the areas of Software Engineering and/or Formal Methods (for a list of topics of interest, please visit the conference website). Prospective workshop organisers are requested to follow the guidelines below and are encouraged to *contact the workshop co-chairs* for possible questions.

Workshop Proposal Submission details and Workshop Proceedings

- To make SEFM workshops appealing for participants, we plan to keep the fares low, with special fees for a combined registration for both workshops and the main conference. However, precise figures have not been decided yet.

We also understand that having a good proceedings publication will attract submissions. For that reason, as we have done starting from 2012, we will organise a joint LNCS proceedings volume for SEFM collocated events. All accepted workshops will be asked to produce a webpage and a call for papers. Both workshop organisers and participants will be required to register through the SEFM 2019 registration webpage and attend their workshop.

- Concerning the information for a workshop proposal (topic, name and affiliation of organizers ...), please see the more *detailed instructions* at <http://sefm2019.inria.fr/workshops>

SEFM'19 General Chairs:

Peter Ölveczky, University of Oslo, NO
Gwen Salaün, Université de Grenoble Alpes, F

SEFM conference important dates:

abstracts:	May 3, 2019
full papers:	May 10, 2019
notification:	June 21, 2019
camera ready copy:	July 12, 2019
main conference:	Sept. 18–20, 2019

More info & contact
